

PRODUCT CHANGE NOTICE

Dear Telit Partner,

Telit would like to inform you that a new EVB 2.0 evaluation board hardware version has been released and will replace the existing EVB 2.0 Ordering Part Number (PN).

This new revision has been introduced to address supply chain issues, guarantee long-term product availability, and make few additional minor features available.

The changes introduced in the new EVB 2.0 release include – among others - additional signals on board connectors, overvoltage protection and an additional voltage regulator for GNSS modules. Furthermore, a GNSS antenna is now included in the kit for modules supporting both cellular and positioning technologies.

The affected Part Numbers (PNs) are listed in the table below:

Product Name	Current Telit Part Number (PN)	New Telit Part Number (PN)
Telit EVB 2.0	3990150687	3990150703

The newer hardware variant is not affecting fit, form and functions. Moreover present, and future TLBs versions are compatible with both evaluation board variants.

The current ordering p/n will be available until stock depletion, then open orders will be converted to the new ordering code.

If you have any question about the present communication, please contact Telit Technical Support or your Regional Sales Representative.

Best regards,
